
PICKING MEANINGFUL CLASSES

REGISTRATION 19 20

MAINTAIN BALANCE

- It is important to maintain a balanced course load and to not take too many challenging classes.
- Consider how many hours of homework and studying each class will entail
- Ensure that you will have enough time for studying
- Make sure that you will have enough time for extracurriculars, family/social commitments and sleep
- There are 7 periods in a day, which is 7 classes to manage

TAKE CLASSES THAT INTEREST YOU

- Take classes that align with your interests
- Don't take a class just because your friend is taking it
- Focus on your strengths
- Consider your future plans and whether you are interested in a 2-year college, 4-year college, joining the military, apprenticeships, vocational school, taking a Gap year, or going straight into the workforce.
- Consider classes that align with these goals

UTILIZING XELLO

As a student, you are able to:

- Explore career interests and various career pathways
- Create a portfolio that records your accomplishments, challenges and future goals
- Build a 4-year plan that aligns high school courses and post-secondary goals
