

Graduation Requirements

In order to graduate from the Lake Washington School District, students must demonstrate proficiency in the following graduation standards:

Certificate of Academic Achievement (CAA): Earn the CAA from Washington State by demonstrating proficiency on the 10th grade English Language Arts (ELA) exit exam, and the Math End of Course Assessments (EOC)

High School and Beyond Electronic Planning

Portfolio: Create a High School and Beyond Plan that includes: (1) self-assessment of interests and aptitudes, (2) plan for their upcoming high school years by reviewing high school courses available to enable them to meet their post-secondary goals and LWSU graduation requirements, (3) develop tools for employment-both present and future.

More information on the graduation requirements can be found on the Lake Washington School District website: www.lwsd.org

Student Government

Eastlake has a traditional government with an ASB President, Vice President, Secretary, Treasurer and Public Relations Officer. Also, each class level elects a President, Vice President, and a Secretary/Treasurer.

To personalize student Government even more, each homeroom has a representative attend a monthly meeting to receive information and give input on upcoming events at Eastlake. These representatives report the current news back to their homerooms.

Eastlake's student government enables the constituents to voice their opinions. It allows students, staff, parents and community leaders the opportunity to work together in making decisions for Eastlake's student-centered environment.

STUDENT SERVICES

Eastlake has established school systems that individualize education and address the needs of all students. Our integrated curriculum now extends beyond Language Arts and Social Studies to include STEM education. To provide students with the necessary time and support to learn, Eastlake offers student interventions during the school day in Math, Science, Literacy and World Language. We also offer a variety of pathways, which include 19 AP and five University of Washington in the High School courses, as well as an array of Career and Technical Education classes in computer science, engineering and business, and biotechnology.

Counseling

Eastlake's certified team of counselors is always ready and available to assist all students with personal counseling, college guidance, scheduling, career exploration and scholarship information.

Career Center

The career center gives students the opportunity to research any college, military branch and other information crucial to their future. Scholarship, volunteer and job opportunities are readily available for student and parent convenience.

Link Crew

Eastlake works deliberately to create a welcoming and positive culture for students. Eastlake has a Link Crew program where junior and senior Link Leaders guide and support incoming ninth graders through their first year.

Homeroom

Eastlake's Homeroom program links our students with the same caring faculty member for the entire four years they are at Eastlake. Homeroom provides academic support, addresses school culture, college and career planning, and other important issues in the lives of teenagers.

Wolf Time

Tuesdays and Thursdays we have Wolf Time after 2nd period, which is a time for students to access enrichment and remediation opportunities from their teachers. During this time, students can make choices of which teacher they want to see, or teachers can request that students come in for support.

Eastlake Mission

Developing the character and intellectual strengths for individual and shared success

Eastlake Values

- Intellectual strengths such as curiosity, creativity, and effective communication
- Personal attributes such as integrity, responsibility, and reflection
- Interpersonal attributes such as empathy, teamwork and service
- Compassion and appreciation for authenticity and diversity
- Growth through initiative, work ethic and perseverance
- Balancing competition and ambition with gratitude and wellness

Wolf Strong, Pack Strong

Eastlake believes that students need to develop the intellectual strength and character necessary for success now and in the future, as captured by our motto Wolf Strong, Pack Strong (WSPS). Eastlake implements this mission by providing dynamic and engaging instruction in every class, every day. Staff challenge students to learn, while supporting them in this process through a personalized and compassionate culture. Teachers consistently collaborate in the planning and implementation of effective, research-based instruction that teaches students interdisciplinary skills such as clear communication and critical thinking.

Eastlake continues to excel in student achievement as noted by our graduation rates and standardized test scores. Furthermore, a high percentage of graduates leave Eastlake to continue their education at universities and technical schools. Eastlake received the Washington Achievement Award for Overall Excellence in 2009, 2010, 2011, 2012 and 2014. Building on past success, Eastlake will continue to provide an incredible learning experience for students both inside and outside of the classroom. Our focus on school culture and "Servant Leadership" ensures students feel valued and connected.

English and Engineering PLTW

Running Start

Running Start is a dual credit program that is offered in the state to 11th and 12th grade students. Students can attend college classes and earn both college and high school credit. Some students will earn their AA degree at the same time as graduation.

WaNIC Courses—(Washington Network for Innovative Careers)

WaNIC provides advanced-level Career and Technical Education courses based on rigorous academic and industry standards preparing students for post-secondary education and successful entry into high skill, high demand careers and employment.

Schedule

High school schedules typically consist of six 50-minute periods. Eastlake offers an alternative method. Four days each week, students have 3 classes which last 95-100 minutes and on Fridays the students attend each of their six classes. This schedule closely resembles a college program and encourages reflection on new material and provides time to work on labs and projects that would be more difficult to complete with shorter periods.
